

## Personal Finance

Some sort of class that might better prepare students for the real world, such as what to expect when they land their first job.

- Bottom of hierarchy (junior person)
- No immediate pay raises
- work environment in general

Taxes/Government: Have info on “hands on.” I don’t even know how to do my taxes. My parents do it, and I think I should know. Politics are confusing.

## Life Insurance

Funding: anything (lack of \$)

Wills

Balancing check book

Bills/Finance

How to function in “Real World” after college

Searching for house/apartment and jobs

Taxes – how to budget \$

Tax deductions, how do they apply?

## Money/Taxes

Economics: Know how to be thrifty, you don’t have to be a scrooge, but you do need to be prepared for the unexpected.

I think students need more information about basic day to day things such as how much to tip people at restaurants and what fork you use at a fancy dinner.
